

ONLINE COMPLAINT REGISTRATION AND MANAGEMENT SYSTEM

1. INTRODUCTION

Project Title:

Online Complaint Registration and Management System

Team Member:

Kavya Veginati

Role:

Full Stack Developer

2. PROJECT OVERVIEW

The Online Complaint Registration and Management System is a full-stack MERN web application developed to streamline complaint handling and improve transparency between users, agents, and administrators.

Features:

- User Registration and Login
- Complaint Submission and Tracking
- JWT Authentication
- Role-Based Access Control
- Agent Assignment Workflow
- Feedback and Ratings
- Admin Analytics Dashboard

3. ARCHITECTURE

Frontend: React.js

Backend: Node.js and Express.js

Database: MongoDB

4. SETUP INSTRUCTIONS

Prerequisites: Node.js, npm, MongoDB, VS Code

5. FOLDER STRUCTURE

Client: components, pages, context, assets

Server: config, controllers, middleware, models, routes

6. RUNNING THE APPLICATION

Backend: cd server → npm start

Frontend: cd client → npm start

URL: <http://localhost:3000>

7. API DOCUMENTATION

Authentication APIs, Complaint APIs, Agent APIs, Feedback APIs, Admin APIs

8. AUTHENTICATION

JWT authentication with bcrypt and role-based access control.

9. USER INTERFACE

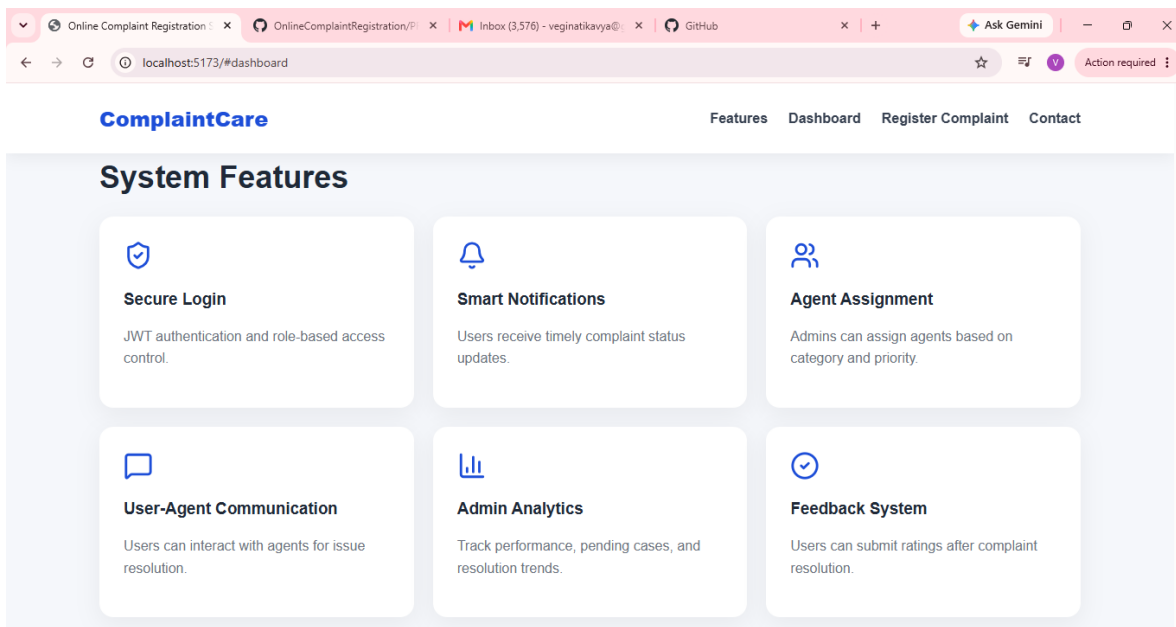

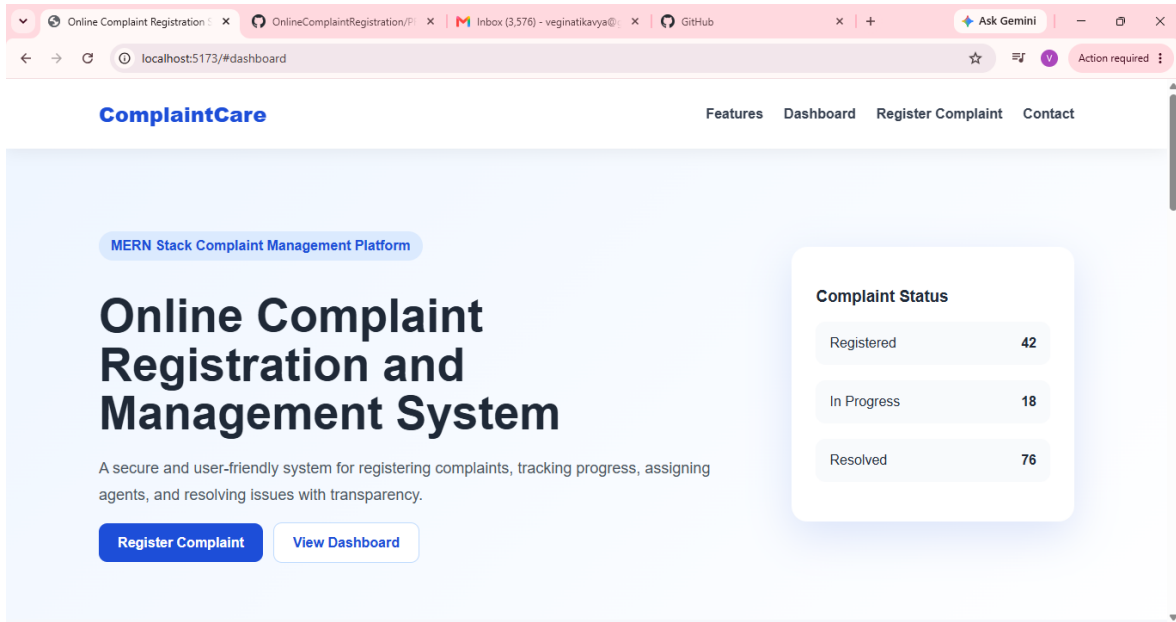

Home Page, Login Page, Registration Page, User Dashboard, Agent Dashboard, Admin Dashboard

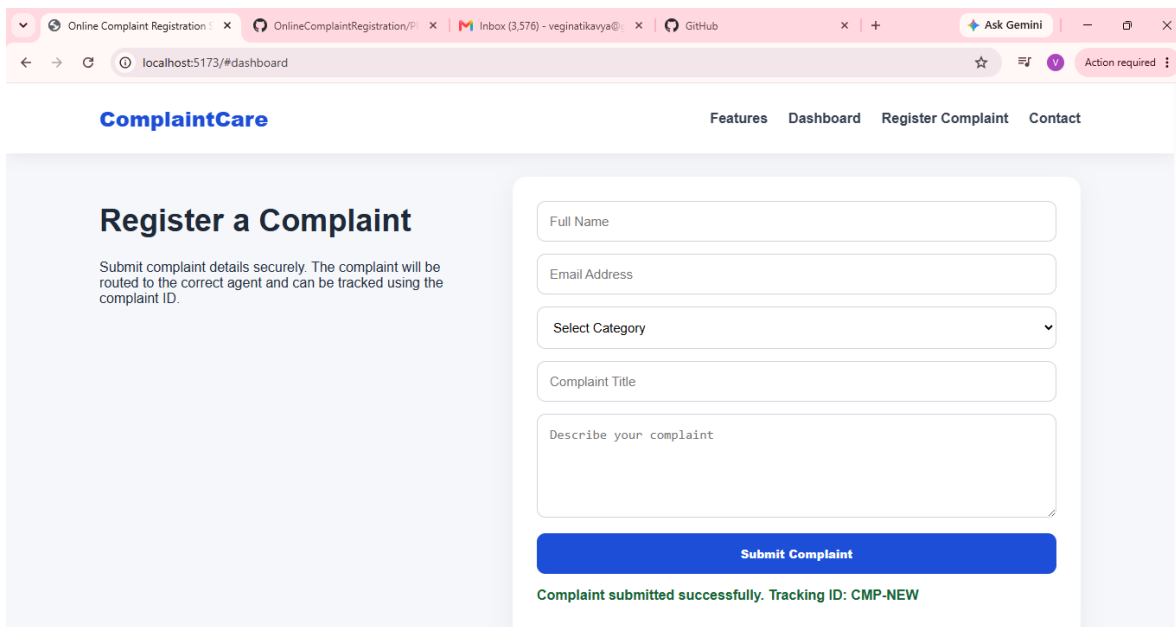

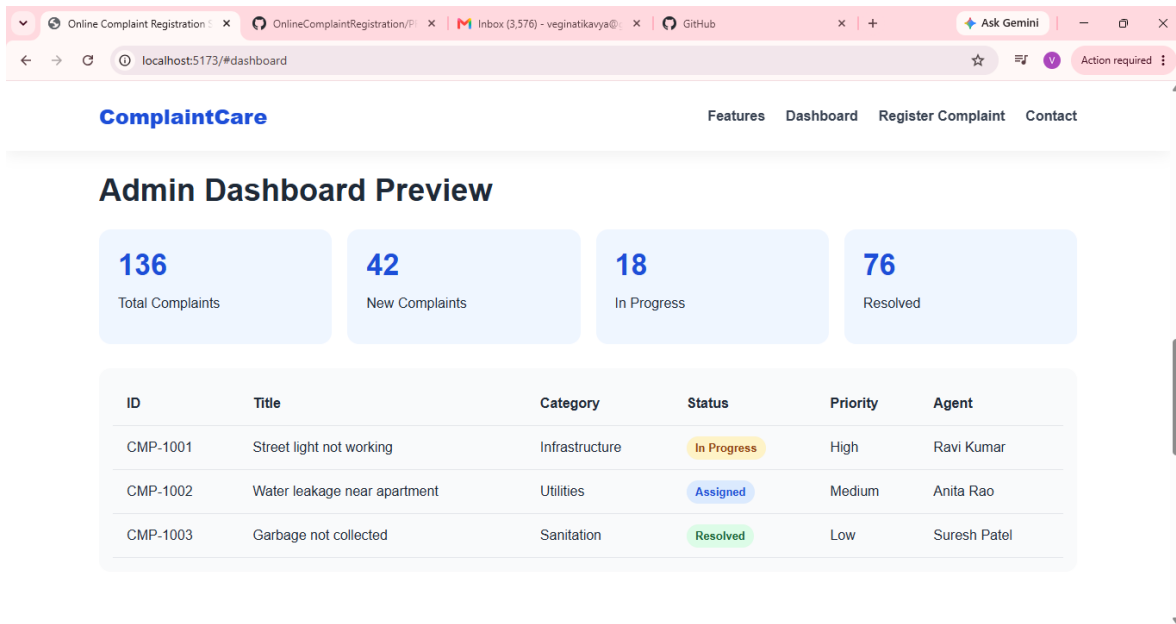

10. TESTING

Registration testing, Login testing, Complaint tracking testing, API testing

11. SCREENSHOTS OR DEMO

Demo URL: <http://localhost:3000>

12. KNOWN ISSUES

MongoDB must be running for persistent storage.

13. FUTURE ENHANCEMENTS

AI categorization, cloud deployment, mobile application support.
